Teacher Name (Circle One) – **Mr. Bishop**      **Mr. Menotti**      **Mr. Whitener**

## **Agriculture Assignments While Dickinson ISD is Closed**

Each week all Agriculture Classes will have a topic on which students will think about, research, and complete an assignment. The topic will relate to Agriculture in some manner and will be submitted either on Google Classroom or in person. Each week we will post the assignment in all Google Classes by 5pm on Friday and it will be available on Monday afternoon for pickup from the school if a paper copy is needed. The Google Class codes have been posted on Mr. Whitener's and Mr. Menotti's teacher webpages. We have also listed the class codes below for all Agriculture Teachers (Mr. Bishop, Mr. Menotti, and Mr. Whitener).

If you have any questions please contact us through email as we will check this daily.

### **Mr. Whitener's Google Classes**

### **Assignment for the week of 04/13/2020 – 04/17/2020 Week 4**

Agriculture is one of if not the most important Industry in the US and the World as of today. The field of Agriculture provides and produces many products, careers and opportunities for all people in our everyday life. Agriculture is the foundation of many things that are important to all people all the time.

- What is Agriculture? Why is it so important to all people on a daily basis? How would this world be today if it was not for the Agriculture Industry? What do you think and how do see the future of Agriculture being like in the upcoming years?

**Please choose one of the following to complete.**

**1 page typed paper**                      -                      **2 page hand written paper**  
**Google slides presentation**                      -                      **Audio or video presentation**

### **Assignment for the week of 04/20/2020 – 04/24/2020 Week 5**

Domestication is very important in terms of Agriculture; it provides many products to many people on a daily basis. Without having domestication the world we live in would be greatly different in many different aspects.

- Why is domestication in Livestock Animals and Agriculture so important to our everyday life? What would the world we live in today be like without domestications? What are some of the products that we get from domestication? If you could domesticate any animal what would it be and why would you choose that animal?

**Please choose one of the following to complete.**

**1 page typed paper**                      -                      **2 page hand written paper**                      -                      **Google slides presentation**

### **Assignment for the week of 04/27/2020 – 05/01/2020 Week 6**

Plants are an important not only to the Agriculture Industry, but also to our everyday lives. Plants provide many products that are beneficial to all forms of life. They are an important part to the Agriculture Industry as well as to our everyday lives. Some say that plants and plant life is the foundation of agriculture and if not for them then the agriculture industry would look drastically different.

- Why are plants important to Humans? Why are plants important to Animals? What are ways that plants can alter or change the environments? Plants can be used to make many products besides food, what are some products that can be made and or come from plants? What do you believe is the most important aspect of plants and plant life? If you had to grow one and only one type of plant what would it by and why would you choose that plant?

**Please choose one of the following to complete.**

**1 page typed paper**                      -                      **2 page hand written paper**                      -                      **Google slides presentation**
